E-LEARNING PRESENTATION

Here is where your presentation begins
CONTENT OF THIS TEMPLATE

Here’s what you’ll find in this template:

- A slide structure based on project proposal presentation, which you can easily adapt to your needs. For more info on how to edit the template, please visit Slidesgo School or read our FAQs.
- An assortment of illustrations that are suitable for use in the presentation can be found in the alternative resources slide.
- A thanks slide, which you must keep so that proper credits for our design are given.
- A resources slide, where you’ll find links to all the elements used in the template.

   and final slides with:
   - The fonts and colors used in the template.
   - A selection of illustrations. You can also customize and animate them as you wish with the online editor. Visit Stories by Freepik to find more.
   - More infographic resources, whose size and color can be edited.
   - Sets of customizable icons of various themes.

You can delete this slide when you’re done editing the presentation.
WHOA!

It could be the part of the presentation where you can introduce yourself, write your email...
“This is a quote. Words full of wisdom that someone important said and can make the reader get inspired.”

—SOMEONE FAMOUS
THIS IS A GREAT 01. HEADLINE

And this is the subtitle that makes it comprehensible
Do you know what helps you make your point clear?
Lists like this one:

- Because they’re simple
- You can organize your ideas clearly
- And because you’ll never forget to buy milk!

And the most important thing the audience won’t miss the point of your presentation.
MAYBE YOU NEED TO DIVIDE THE CONTENT

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it’s only a bit larger than our Moon. The planet’s name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury.

VENUS

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It’s the second-brightest natural object in the night sky after the Moon.
YOU COULD USE THREE COLUMNS, WHY NOT?

MARS
Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust, which gives the planet its reddish cast.

JUPITER
It's a gas giant and also the biggest planet in our Solar System. Jupiter is the fourth-brightest object in the sky.

MERCURY
Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon.
A PICTURE ALWAYS REINFORCES THE CONCEPT

Images reveal large amounts of data, so remember: use an image instead of long texts. Your audience will appreciate that...
A PICTURE IS WORTH A THOUSAND WORDS
Key words are great for catching your audience’s attention
And this is the subtitle that makes it comprehensible.
Despite being red, Mars is a cold place, not hot. It’s full of iron oxide dust.

Venus has a beautiful name, but it’s terribly hot, even hotter than Mercury.

Mercury is the closest planet to the Sun and is only a bit larger than our Moon.
Venus has a beautiful name, but it’s terribly hot.

Mercury is the closest planet to the Sun.

Despite being red, Mars is a cold place, not hot.

Neptune is the farthest planet from the Sun.
INFOGRAPHICS MAKE YOUR IDEA UNDERSTANDABLE...

Saturn is the ringed one. It's composed mostly of hydrogen and helium.

Neptune is the farthest planet from the Sun and the fourth-largest by diameter.

Venus has a beautiful name and is the second planet from the Sun. It's very hot.

Mercury is the closest planet to the Sun and the smallest one in our Solar System.
... AND THE SAME GOES FOR TABLES

HOW ABOUT THE PERCENTAGES?

MARS
Despite being red, Mars is a cold place, not hot

VENUS
Venus has a beautiful name, but it’s terribly hot

NEPTUNE
Neptune is the farthest planet from the Sun

MERCURY
Mercury is the closest planet to the Sun
Big numbers catch your audience’s attention
333,000.00 earths is the Sun’s mass

24h 37m 23s is Jupiter’s rotation period

386,000 km is the distance between the Earth and the Moon
SOMETIMES, REVIEWING CONCEPTS IS A GOOD IDEA

MARS
Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust.

VENUS
Venus has a beautiful name and is the second planet from the Sun.

MERCURY
Mercury is the smallest planet in our Solar System.

JUPITER
Jupiter is a gas giant and the biggest planet in our Solar System.

SATURN
Saturn is a gas giant, composed mostly of hydrogen and helium.

NEPTUNE
Neptune is the fourth-largest planet in our Solar System.

Stories by Freepik

Create your Story with our illustrated concepts. Choose the style you like the most, edit its colors, pick the background and layers you want to show and bring them to life with the animator panel! It will boost your presentation. Check out how it works.
Use our editable graphic resources...

You can easily resize these resources without losing quality. To change the color, just ungroup the resource and click on the object you want to change. Then, click on the paint bucket and select the color you want. Group the resource again when you're done. You can also look for more infographics on Slidesgo.
...and our sets of editable icons

You can resize these icons without losing quality.

You can change the stroke and fill color; just select the icon and click on the paint bucket/pen.

In Google Slides, you can also use Flaticon's extension, allowing you to customize and add even more icons.
